THE EIGHTEENTH
ANNUAL REPORT

CITY OF LACONIA

FOR YEAR ENDING
FEBRUARY 15, 1911

Hamilton Smith
Library
University of
New Hampshire

MAYOR AND CITY COUNCIL, 1910.

Standing, left to right—C. J. Avery, E. J. Fitzgerald, F. S. Willey, T. J. McIntyre, H. L. Smith, C. H. Dow, A. E. Hill, W. L. Delorey, G. B. Munsey, City Clerk.
 Sitting—G. W. Hoyt, F. A. Rand, J. G. Quimby, Mayor A. C. Wyatt, E. P. Thompson, C. M. Avery, M. M. Robinson.

NINETEEN HUNDRED AND ELEVEN.

EIGHTEENTH ANNUAL REPORT

OF THE

RECEIPTS AND EXPENDITURES

OF THE

CITY OF LACONIA

NEW HAMPSHIRE

FOR THE

Year Ending February 15, 1911

TOGETHER WITH OTHER ANNUAL REPORTS AND PAPERS
RELATING TO THE AFFAIRS OF THE CITY.

Laconia Press Association, Printers.

MAYORS OF THE CITY OF LACONIA.

City incorporated by Act of Legislature approved March 24, 1893. First organization of city government May 3, 1893.

*CHARLES A. BUSIEL	1893-4
SAMUEL B. SMITH	1895-6
CHARLES L. PULSIFER	1897-8
EDMUND TETLEY	1899-10
JARED A. GREENE	1901-2
WOODBURY L. MELCHER	1903-4
BENJAMIN F. DRAKE	1905-6
WILLIAM F. KNIGHT	1907-8
ALFRED C. WYATT	1909-10

*Deceased.

ORGANIZATION OF CITY GOVERNMENT.

TUESDAY, March 22, 1910.

At ten o'clock in the forenoon of the above date, members-elect of the city council for the municipal year of 1910 and the hold-over members from the previous council met for organization at the city council room agreeably to the provisions of the city charter.

The oath of office was administered to the mayor-elect, Hon. Alfred C. Wyatt, by Stephen S. Jewett, Esq.

The mayor administered the oath of office to the following councilmen-elect, viz.:

Ward 1—Caleb J. Avery.

Ward 2—*William L. Delorey.

Ward 3—Charles M. Avery.

Ward 4—Frank S. Willey.

Ward 5—Fred A. Rand.

Ward 6—Harry L. Smith,
George W. Hoyt.

Prayer was then offered by the Rev. George L. Thompson, after which the mayor delivered his inaugural address.

*William L. Delorey being unavoidably absent, the oath of office was administered by Acting Mayor E. P. Thompson, Mar. 28.

INAUGURAL ADDRESS

OF HON. ALFRED C. WYATT, MARCH 22, 1910.

Gentlemen of the City Council:

By electing us to the responsible positions which we now occupy for the ensuing year, the voters of the City of Laconia may justly be regarded as endorsing with their approval the policy of the administration of the past year. The personnel of the council is the same with two exceptions, and they are men who have filled with credit municipal positions.

I regard it as the best type of business judgment to return efficient men to the council, term after term, to look after the affairs of the city. No man who employs labor would even consider the changing of his working force every two years.

The conduct of the affairs of a city government is primarily and essentially a business affair. Like any other business, the financial part of it is the most important foundation stone. In the business world loose and careless financiering will soon be followed by failure and disaster. In municipal affairs it will be followed by a higher tax rate and an increase of debt.

In the year just closed we have proved that Laconia can live within its income and reduce its indebtedness at the same time, on a tax rate of \$24.00 per thousand in five of the wards, and \$25.00 in Ward 6. This year will see the tax rate uniform in the entire city, as the last of the Ward 6 notes have been paid.

The largest problem you will be required to work out, gentlemen, is how much better you can do this year than

you did last. Your assessors must furnish you the basis on which to begin your work.

If they do their work properly you can easily fix your appropriations, reduce your tax rate, give the people what they ought to have, and materially reduce the city's indebtedness.

In this connection I wish to call your attention to certain facts. The year 1895 was perhaps the darkest year in our city's history. Fifteen years ago today, Hon. Samuel B. Smith in his inaugural address used these words: "Business is stagnated, or struggling along without profit, hoping almost against hope for the dawn of a brighter day. The pay of the laboring man (if he has employment) is small. Everybody, rich and poor as well as the middle class, alike feel the need of economy."

Now, gentlemen, let us look at the statement of the financial condition in that year. We had 2,396 ratable polls, and a total valuation of \$4,758,628. Compare this, if you please, with the financial condition as found by our assessors in the year just passed. There were 2,863 ratable polls, a gain of 467; a valuation of \$4,898,260, a gain of only \$139,632, and every dollar of this gain except \$2,294 was made in 1909. It is true that during this period we had the great Lakeport fire.

The tax rate in 1895 was \$18.80 per thousand in Wards 1, 2, 3, 4 and 5, and \$20.00 in Ward 6. With this valuation before you and considering the gain in ratable polls, do you wonder that in 14 years your tax rate has increased to \$25.00 in Ward 6, and \$24.00 in all the other Wards?

On the 19th day of October, 1909, before Julian F. Trask, a Justice of the Peace, your assessors subscribed to the following oath: "We the assessors of the City of Laconia, do solemnly swear that in making the invoice for assessing the foregoing taxes, we appraised the property at its full value as we would appraise the same in payment of a just debt from a solvent debtor."

Early in November last I invited the assessors to meet

me in my office for a friendly discussion of the financial condition of our city, and to see what steps could be taken, if any, to reduce the tax rate, and all the members of the board were present. I wish to present the same facts to you that I did to them.

I called their attention to eight houses in the city which did not appear in their inventory, although some of them had been built several years, and in some cases not even the lot on which the house was built was entered in the book. I requested them to come before the council and ask to have a commission appointed to act with them to re-appraise the property of this city—they did not favor my suggestion.

The time is too short for us to discuss and compare the relative values of property in this city today, but in order to bring before you certain conditions for your consideration I will confine myself strictly to their own property which represents every class of property in this city save one. That one is our manufacturing industries, which are in a class by themselves as considered with the other property of this city.

Every safeguard should be thrown around our manufacturing industries; they are the bulwark of our city—without them we could not exist. Our assessors should be lenient in the matter of their taxation.

Perhaps no one appreciates more than I do how hard it is to induce new industries to locate in Laconia, with other cities and towns nearer to Boston offering exemption and free rent for a term of years, as well as other inducements for them to locate in their midst.

The property of our assessors as it exists today comprises the following kinds, viz: boulevard property, centrally located city residences, farm property, timber land, shore frontage on the lake, business blocks on Main street, tenement property adjacent to Main street, and property suitable for manufacturing sites with side-track facilities.

As I have previously told you the years 1895 and 1896

were years of hardship, when perhaps the valuation of their property might be at its lowest point, and by 1909 it should have increased considerably in value. Let us see if this is the case.

The property to which I will call your attention consisted of seven separate lots in 1896, and we will use the same seven parcels in 1909 for comparison.

The appraisal of these seven pieces of property is as follows:

Lot No. 1	in 1896,	\$3,650;	in 1909,	\$3,300,	\$ 350 less.
" 2	"	3,500;	"	2,500,	1,000 "
" 3	"	4,600;	"	3,400,	1,200 "
" 4	"	800;	"	700,	100 "
" 5	"	6,300;	"	5,600,	700 "
" 6	"	2,000;	"	2,000.	No loss.
" 7	"	650;	"	520,	130 less.

Is it not somewhat remarkable, gentlemen, that some of this property does not show an increased valuation? Should it not have at least held its own?

I do not tell you that every piece of this property is worth double what it is appraised today, but I can see in the seven pieces one that I will take at thirteen times its appraised value in 1909, and another that to me is worth five times its appraisal. Understand I do not mean to say that this property should be assessed at these figures, but I do say that it should pay a fair proportion of what it is really worth.

The operation or administration of the law rests with an assessing board. This board is chosen directly by you, and the people of this city have only you to blame if they suffer from defective administration. Matters are allowed to drift for the reason that nearly every person knows that certain pieces of his property are escaping taxation entirely or are being undervalued, and, that attention may not be drawn to these facts, he deems it the part of prudence to maintain silence concerning his neighbors' assessment.

Nominally, inventory books are open to public inspection, in reality they are rarely examined; for the people do not care to go to the trouble of visiting the city clerk's office either to have him look it up for them or to look it up for themselves. If they did, they would find the story short but very interesting reading.

Is it any wonder, gentlemen, that we all rejoiced when the celebrated Lake Co. tax cases were settled?

For many years it has been recommended that a plan of the compact part of the city should be made. I am of the opinion that if this were done, there would be less trouble in fixing the value of property, as I can see no good reason why the lot should not be valued by itself, before the building on the lot is considered. I hope something may be accomplished along this line this year, as it is manifestly unfair to appraise land unless you are sure of the area of it as compared with adjoining lots.

I am quite sure that if the inventory of this city were published in pamphlet form and distributed among tax payers it would be a much better investment than it is to publish so many city reports.

I have been unable to induce the Park Commissioners, elected one year ago, to qualify, although one of them, Mr. Henry B. Clow, has acted as my agent, and has looked after the Leavitt Park property and superintended the work done, and expended the money available for the purpose.

The remainder of the park property and the expending of the income from the trust funds on the cemetery lots, have been under my direction. The city now holds in trust for the care of the lots in the various cemeteries, four thousand, four hundred and seventy-five dollars. This amount is increasing every year and in the near future should be placed with our park property in the hands of a competent park commission.

During the past year our system of electric lighting has produced very unsatisfactory results, while the company

has been hampered by low water and breakdowns which were perhaps beyond their control; the lights have been poor nearly all the time. I am thoroughly convinced that the city would be far better lighted at a less cost with Tungsten lights than it now is with the present system installed. The company made strenuous efforts last summer to have this system put in, but their proposition did not meet with favor and it found an early grave.

Our contract with the Water Co. expired some time ago. In the near future I hope that certain things which should be done by the Water Co. and the city in order to get a reduction on our insurance rate, will be accomplished and a new contract made. In the meantime the Water Co. is furnishing water at the same rate, as the old contract, by the terms of which we have a right to renew it if we desire to do so.

During the year just passed our city has been unusually prosperous, our appropriations have been judiciously expended, and the finance committee in making their recommendations have been guided by what has been done in the years past and have made them with a view of finishing work already begun.

I need not go into detail regarding these appropriations; you are all familiar with our needs and I trust that when they are voted you will see that only those are made that will give benefit where it should be placed.

Every tax payer is entitled to his rights; be square, honorable, firm and considerate to them all and you should have their united support. I have called your attention only to some of the more important matters which will receive your attention. There are others also of importance of which I have made no mention, as a study of the full reports will give you all necessary information as to the standing and requirements of the several departments of the city.

Now, gentlemen, the management of municipal affairs for the next year is in your hands, and the people will

hold you accountable for this management. The mayor has but little power, but in all I do I shall endeavor to cooperate with you in all things for the welfare and good government of our city, and in all things we should be governed by a desire to promote the greatest good for the greatest number.

Gentlemen of the council, I thank you for your attention, and I am now ready to proceed with the business of this session.

MUNICIPAL REGULATIONS

FOR PAYMENT OF BILLS AGAINST THE CITY.

All bills against the city must be approved by the person authorizing the charge; and unless this is done, no action can be had upon the bill by the committee on accounts and claims, and no order will be given for its payment.

When bills are certified to as above, and left with the city clerk not later than Thursday, at 12 o'clock m., preceding the last Monday of each month, they will be audited by the committee on accounts and claims, and if approved by them and allowed by the council, will be ready for payment on the following Wednesday, at the office of the city treasurer.

Meetings of the committee on accounts and claims are held on the Friday preceding the last Monday of each month, at 7.30 o'clock P. M., at the city clerk's office.

CITY GOVERNMENT,

LACONIA, N. H.

Inaugurated fourth Tuesday of March, yearly. Stated meetings: The last Monday of each month, at 7.30 o'clock, p. m., at city council room, Masonic Temple, Main street.

RESOLUTIONS.

RESOLUTIONS.

A RESOLUTION authorizing the city treasurer to hire the sum of four thousand dollars (\$4,000.00).

Resolved by the City Council of the City of Laconia, as follows:

That the city treasurer be and is hereby authorized to hire on the credit of the city the sum of four thousand dollars (\$4,000) to pay the Winnepesaukee Lake Cotton and Woolen Manufacturing Company in settlement of an abatement of taxes, and that the mayor draw his warrant for the same in settlement of the suits of said Company against said City.

Passed March 9, 1910.

Approved, ALFRED C. WYATT, Mayor.

A RESOLUTION authorizing the city treasurer to hire money in anticipation of taxes.

Resolved by the City Council of the City of Laconia, as follows:

That the city treasurer be and hereby is authorized to hire on the credit of the city a sum of money not exceeding fifty thousand dollars (\$50,000) in anticipation of taxes for the present year, the same to be borrowed upon notes of the city signed by the mayor and treasurer and countersigned by the city clerk.

Passed March 28th, 1910.

Approved, ALFRED C. WYATT, Mayor.

A RESOLUTION appropriating money in re-payment of taxes abated.

Resolved by the City Council of the City of Laconia, as follows:

That the sum of nine dollars and seventy cents be and

the same is hereby appropriated to pay Emma L. Jewett for taxes assessed upon property which she had sold and the mayor is hereby authorized to draw his warrant for the same.

Passed May 31st, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION appropriating money to pay for land purchased at the corner of Sheridan and North streets.

Resolved by the City Council of the City of Laconia, as follows:

That the sum of one hundred dollars be and the same is hereby appropriated to pay Ada Clough for land purchased to widen and straighten the street at the corner of Sheridan street and North street and the Mayor is hereby authorized to draw his warrant for the same, upon the receipt of a good and sufficient deed to the city.

Passed and approved May 31st, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION making appropriations for the year ending February 15, 1911.

Resolved by the City Council of the City of Laconia, as follows:

That the following appropriations be made for the year ending February 15, 1911, which appropriations shall be in full for all expenditures in each department named:

Permanent improvement of Bank square by concrete covering on cement base	4,500.00
Repairs on hose house at The Weirs	400.00

 \$140,865.07

Passed May 31st, 1910.

Approved.

ALFRED C. WYATT, *Mayor*.

A RESOLUTION raising money by taxation for the year ending February 15, 1911.

Resolved by the City Council of the City of Laconia, as follows:

There shall be raised, and there is ordered to be raised on the polls and estate liable to be taxed within said city, the sum of one hundred and twenty-two thousand dollars (\$122,000.00) to defray the necessary expenses and charges of the city for the financial year ending February 15, 1911.

Passed May 31st, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION authorizing the committee on fire department to expend the appropriations for repairs to fire stations.

Resolved by the City Council of the City of Laconia, as follows:

That the committee on fire department be and hereby is authorized to expend a sum of money not exceeding four hundred dollars (\$400.) for the repairs of the Lakeport fire station, and the same committee is further empowered to expend a like sum of money for the repair of the hose house at Weirs, both according to appropriations made May 31st, 1910.

Passed May 31st, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION appropriating a sum of money not exceeding five hundred dollars (\$500.) to widen and bring to grade Belknap street from Lyford to Oak street.

Resolved by the City Council of the City of Laconia, as follows:

That a sum of money not to exceed five hundred dollars (\$500) be and hereby is appropriated for the purpose of widening and bringing to grade Belknap street from Lyford to Oak street. The mayor is hereby authorized to

draw his warrant for the payment of the same out of money not otherwise appropriated.

Passed June 27th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION authorizing the purchase of a hose wagon.

Resolved by the City Council of the City of Laconia, as follows:

That a special committee to consist of the mayor and the committee on fire department be and hereby is authorized to purchase for the city a new hose wagon, at a cost not to exceed sixteen hundred dollars (\$1600) for which appropriation was made May 31, 1910.

Passed June 27th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION authorizing the borrowing of money for the construction of sanitary sewers.

Resolved by the City Council of the City of Laconia, as follows:

That notes of the City of Laconia are hereby authorized to be issued, to be signed by the mayor and city treasurer, and countersigned by the city clerk for a sum not exceeding twenty thousand dollars, (\$20,000.00) for the purpose of constructing such additional sanitary sewers to be connected with the present sanitary sewer system of the city as shall be determined upon by the city council to be needed, with coupons on said notes for interest semi-annually, at four (4) per cent. per annum, payable on the first day of January and the first day of July in each year.

Said notes shall be dated the first day of July, 1910; shall be payable to bearer, and be for the sum of five hundred dollars (\$500) each, and shall be numbered consecutively from one to the whole number of five hundred dollar notes which shall be issued, and shall become due and payable July 1, 1925.

Provided that at any time after the expiration of five years from July 1st, 1910, the city of Laconia shall have the power and authority by a majority vote of the city council at any regular meeting of the city council, to call in, take up and pay and discharge any or all of the said issue of notes then outstanding.

Section 2. The money borrowed on said notes from individuals living in the City of Laconia shall be exempt from taxation.

This resolution shall take effect and be in force from and after its passage.

Passed July 11th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION appropriating three thousand five hundred dollars for the extension of the permanent highway on Pleasant street.

Resolved by the City Council of the City of Laconia, as follows:

That the sum of three thousand five hundred dollars (\$3,500) be and the same hereby is appropriated for the purpose of extending the permanent construction of the highway on Pleasant street up to the railroad track, the same to be expended under and by direction of the board of public works and the mayor and finance committee are hereby authorized to borrow on the credit of the city, said sum of three thousand five hundred dollars on such time and in such manner as to them shall seem proper.

Section 2. This resolution shall take effect upon its passage.

Passed July 11th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION appropriating money to enlarge the Weirs schoolhouse.

Resolved by the City Council of the City of Laconia, as follows:

That such part of one thousand dollars as is necessary,

is hereby appropriated, and the committee of public instruction in conjunction with the board of education is hereby authorized to procure specifications and advertise for bids for the construction of the same, and the mayor is hereby authorized to draw his warrant for the same.

Passed July 25th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION accepting certain funds given to the City of Laconia in trust for certain purposes.

Resolved by the City Council of the City of Laconia, as follows:

Whereas by an instrument in writing bearing date March 21, 1908, Julia H. A. Crockett of Wilmington, in the Commonwealth of Massachusetts, and Ella J. Smith of Woburn, in said Commonwealth, gave to the City of Laconia sixty-two and thirty-one shares respectively of the capital stock of the Belknap County Agricultural Society of the value as expressed in said instrument of the sum of one hundred and eighty-six dollars, said gift being conditioned that the city expend from year to year a sum equal to three per cent. on said sum of one hundred and eighty-six dollars for the care of the lot in Union Cemetery in said Laconia in which the remains of John F. Crockett, late of said Laconia, lie buried.

Now, therefore, resolved that the City of Laconia accepts said trust created by said gift under the conditions thereof, viz.: The City of Laconia accepts from the said Julia H. A. Crockett and Ella J. Smith ninety-three shares of the capital stock of the Belknap County Agricultural Society at the value for all the same of one hundred and eighty-six dollars in trust for the purpose of expending the annual income on said sum at three per cent. for the care of the lot in said Union Cemetery in which the remains of said John F. Crockett lie buried.

Passed July 25th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION authorizing a re-appraisal of the real estate in the City of Laconia.

Resolved by the City Council of the City of Laconia, as follows:

Section 1. The city council shall immediately upon the passage of this resolution elect two men who shall act in conjunction with the board of city assessors, as a special committee in making a re-appraisal of all real estate in said city. Said board of special committee as constituted shall each receive three dollars per day for the time actually spent in the work.

Sec. 2. The city assessors in conjunction with said two persons to be elected by the city council are hereby authorized and directed to make a re-appraisal of each and every parcel of real estate situate within the limits of said city. Said board with all the members thereof present shall visit every parcel of land and appraise the same in the following manner:—The members of the board shall each be provided with a pad of blank paper, a sufficient number of which shall be procured exactly alike to supply said board. They shall each mark upon a sheet the value which in their judgment, the parcel of land which they are appraising shall be worth, which sheet shall be given to the chairman without any distinguishing marks upon them; the chairman shall then add them together and divide the result by the number present and from the result thus obtained the board shall determine the valuation of said parcel of land in accordance with the laws of the State of New Hampshire.

Sec. 3. Said board shall commence its duties as near the first day of September as is practical and continue the same as fast as possible until the work is completed.

Sec. 4. The mayor is hereby authorized to draw his warrant for the payment of the members of the board and incidental expenses incurred in the prosecution of the work.

Passed July 25th, 1910.

Approved,

ALFRED C. WYATT, *Mayor*.

A RESOLUTION in amendment of a resolution entitled "A Resolution authorizing the borrowing of money for the construction of Sanitary Sewers."

Resolved by the City Council of the City of Laconia, as follows:

That a resolution entitled "A Resolution authorizing the borrowing of money for the construction of Sanitary Sewers," passed and approved July eleventh, 1910, be and the same is hereby amended as follows:—Strike out the word "four" and figure "(4)" in the thirteenth line of said resolution and insert in place thereof the words "three and a half" and figures " $(3\frac{1}{2})$ "; strike out the words "five hundred" in the sixteenth line, and the figures "(\$500)" in the seventeenth line and insert in place thereof the words "one thousand" and the figures "(\$1000.)"; strike out the words "five hundred" in the eighteenth line and insert in place thereof the words "one thousand," so that said resolution as amended shall read as follows:—

"City of Laconia.

In the year of our Lord one thousand nine hundred and ten.

A RESOLUTION authorizing the borrowing of money for the construction of Sanitary Sewers.

Resolved by the City Council of the City of Laconia, as follows:

That notes of the City of Laconia are hereby authorized to be issued, to be signed by the mayor and city treasurer, and countersigned by the city clerk for a sum not exceeding twenty thousand dollars, (\$20,000.00) for the purpose of constructing such additional sanitary sewers to be connected with the present sanitary sewer system of the city as shall be determined upon by the city council to be needed, with coupons on said notes for interest semi-annually, at three and a half ($3\frac{1}{2}$) per cent. per annum, payable on the first day of January and the first day of July in each year.

Said notes shall be dated the first day of July, 1910;

shall be payable to bearer, and be for the sum of one thousand dollars (\$1,000.) each, and shall be numbered consecutively from one to the whole number of one thousand dollar notes which shall be issued, and shall be due and payable July 1, 1925.

Provided that at any time after the expiration of five years from July 1st, 1910, the city of Laconia shall have the power by a majority vote of the city council at any regular meeting of the city council, to call in, take up and pay and discharge any or all of the said issue of notes then outstanding.

Section 2. The money borrowed on said notes from individuals living in the city of Laconia shall be exempt from taxation.

This resolution shall take effect and be in force from and after its passage."

Passed August 29th, 1910.

Approved.

ALFRED C. WYATT, *Mayor*.

A RESOLUTION appropriating four hundred dollars for the grading and repair of Strafford street.

Resolved by the City Council of the City of Laconia, as follows:

That the sum of four hundred dollars (\$400.) be and hereby is appropriated for the grading and repair of Strafford street, and the mayor is hereby authorized to draw his warrant for the same.

Passed October 31st, 1910.

Approved.

ALFRED C. WYATT, *Mayor*.

A RESOLUTION appropriating twelve hundred and thirty dollars for a surface drain on Whipple avenue.

Resolved by the City Council of the City of Laconia, as follows:

That the sum of twelve hundred and thirty dollars (\$1,230.) be and hereby is appropriated for the construc-

tion of a surface drain on Whipple avenue, and the mayor is hereby authorized to draw his warrant for the same.

Passed November 4th, 1910.

Approved, ALFRED C. WYATT, *Mayor*.

A RESOLUTION exempting James McGloughlin from taxation on property used in his foundry business for the term of five years, over and above the sum of twenty-five hundred dollars (\$2,500.00).

Resolved by the City Council of the City of Laconia, as follows:

That the City of Laconia hereby exempts from taxation James McGloughlin on all real estate, buildings, machinery, excepting stock in trade, employed and to be employed, in his iron foundry business, over and above the sum of twenty-five hundred dollars (\$2,500.) for the term of five years from January 30th, 1911.

Passed January 30, 1911.

Approved, ALFRED C. WYATT, *Mayor*.

CONTRACT.

This agreement made this twelfth day of October, 1910, between the city of Laconia, a municipal corporation duly established and existing in the County of Belknap and State of New Hampshire, acting by its mayor, Alfred C. Wyatt, and its standing committee of its city council on lighting streets, consisting of Edwin P. Thompson, Fred A. Rand and William L. Delorey, said mayor and said standing committee being duly authorized by vote of the city council of said Laconia to make and execute a contract in its behalf in modification of a contract now existing between said City of Laconia and the Laconia Electric Lighting Company, dated April 4, 1905, of the first part, and the Laconia Gas and Electric Company, a corporation duly established under the laws of the State of New Hampshire and having its office and principal place of business in said Laconia, of the second part, witnesseth:—

That whereas the said party of the second part is now the owner of the property and franchise of the Laconia Electric Lighting company, a corporation heretofore located and doing business in said Laconia;

And whereas the said City of Laconia and said Laconia Electric Lighting Company entered into a contract bearing date April 4, 1905, (said contract being printed in the thirteenth annual report of the City of Laconia, commencing on page 42), for the furnishing of electric lighting for the said City of Laconia, the party of the first part, by the said Laconia Electric Lighting Company, its successors and assigns;

And whereas in said contract it is agreed as follows:

“Said party of the second part further agrees that within

the compact part of Laconia proper and also the compact part of Lakeport all poles set for the purpose of stringing wires or maintaining lamps in position shall be of good quality Georgia pine, old growth white pine, white oak or chestnut; that all poles will be sawed square or octagonal, will be straight, having their tops apexed and be not less than eight (8) inches square at the base for square poles, and not less than (9) inches between parallel sides of octagonal poles. Outside the compact part of Laconia proper and the compact part of Lakeport, straight, round poles of the same kind of wood, and of sufficient size will be set. All poles will be located subject to the approval of the Board of Public Works of said City of Laconia and will be kept painted, and said party of the first part may use the topmost cross arms of each pole for fire alarm or other municipal wires free of cost."

(Said before-mentioned quotation from said agreement being found in the thirteenth annual report of the City of Laconia on pages 45 and 46.)

And whereas the party of the second part has petitioned the city council of said Laconia, the said party of the first part, for a modification of said contract, in that it may be permitted to erect and maintain during the remainder of the term of said hereinbefore-mentioned contract, round poles instead of square poles for the purpose of stringing its wires thereon through Court street, across Main street, through Union avenue and Bridge and Moulton streets:

Now therefore, the said party of the first part agrees with said party of the second part that said hereinbefore-mentioned contract shall be modified to this extent:

That said party of the second part, its successors and assigns, shall during the remainder of the term of said contract, be permitted to erect and maintain round poles instead of square or octagonal poles through Court street, across Main street and through Union avenue and Bridge and Moulton streets for the purpose of stringing its wires thereon. Said poles shall be set and located, and said

wires strung thereon under the direction and approval of the city engineer of said City of Laconia, the party of the first part. Said poles shall be straight, round, smooth chestnut poles, which shall be approved by said city engineer, and said poles shall be kept painted of a color to be designated and approved by said city engineer.

Said party of the first part to be reimbursed by the party of the second part for all expense incurred by said party of the first part relating to the setting and maintenance of said poles.

And the said party of the second part, for itself, its successors and assigns, agrees with said party of the first part that in the setting and maintenance of its said round poles on and through Court street, across Main street, on and through Union avenue and Bridge and Moulton streets, that it will set straight, round, smooth chestnut poles, and only such poles as shall be approved by the city engineer, and that it will only set and maintain its poles and wires thereon, on, through, over and across said streets and avenue in such location as shall be approved and designated by said city engineer and under his direction. That it will keep said poles painted with such color of paint as shall be designated and approved by said city engineer, and that it will re-imburse said party of the first part for all expenses incurred by it relating to the setting and maintaining of said poles.

It is understood and agreed between said parties hereto that nothing herein contained shall create any liability to the party of the first part for any damage to persons or property by reason of the erection of said poles and the stringing and maintaining of wires thereon for the transmission of electric current, and that nothing herein contained shall absolve the party of the second part or lessen or take away from it any liability for damages to persons and property which may be occasioned by any pole, wire, lamp or other apparatus or construction of the party of the second part.

In witness whereof the parties hereto have hereunto set their hands and seals the day and year first herein written.

SCHOOL DEPARTMENT.

REPORT OF THE BOARD OF EDUCATION.

To the Citizens of Laconia:

Upon the following pages, you will find the reports of the superintendent of schools, the principal of the High school, and the teachers of music and drawing. Your board recommend that you read these reports carefully, as they will give you a good idea of what is being done in our schools, and we think, will convince you that our schools are doing good work, and are worthy of your support.

ALBERT C. MOORE,

Secretary of the Board of Education.

SUPERINTENDENT'S REPORT.

To the Board of Education:

I have the honor and pleasure of presenting to you my fourteenth annual report, in which you will find a short account of the year's progress in school affairs extending from the close of the report of last year to the present time.

The amount of money set apart by the city council for school purposes while larger by \$1,500 than last year has scarcely been sufficient to cover our expenses. The increase has gone into teachers' salaries almost entirely as our other expenses have been scarcely larger than the average for several years. This increase has been justly merited and my only regret is that it could not have extended to every individual teacher who had to her credit length of service or successful experience. It has been a troublesome matter to adjust salaries with only limited funds at command but to speak for myself alone I can say that considering all the factors involved I have simply exercised my best judgment. It can not be expected that young teachers directly from the training school without experience can have their pay raised. But as time goes on and they gain maturity shown by our teachers of longer terms of service they should be added to the list of those whose work is appreciated by an increase of compensation.

The changes in the teaching force since my last annual report have been the fewest in recent years. No change whatever has occurred at either Batchelder, Bowman, Gilford avenue or Washington street schools.

Principal Williams of the high school left us early in February, 1910, for a more lucrative position as principal

of the Plymouth, Mass., high school, and your superintendent was made acting principal for the remainder of the year. At your suggestion, several high schools were visited as time would permit and as a result Mr. Verne M. Whitman, of the Milford, N. H., high school was elected by your board, principal of our high school. Miss Sarah E. Sturtevant retired from her position as teacher of third and fourth grade Mechanic street school after many years of efficient service. The life and character of this woman have added materially to the welfare of our city and I cannot fail to express my own personal appreciation for her labor bestowed and spirit exemplified in her field of chosen labor and wish her many years of future happiness. Miss Mary L. Chase succeeded Miss Bernice L. Lougee, who resigned at the opening of the school year in September. Miss Chase returns to our schools after a season of rest, having first commenced her work as teacher in Laconia in 1892. Miss Evelyn Russell was placed in charge of the third and fourth grade school at Mechanic street having taken the place of Miss Sturtevant, resigned. At the Weirs, Miss Nellie K. Bates was elected to the new position made possible by the division of the school; she was placed in charge of the primary section, while Mrs. George took the upper grades.

The work of our janitors is a very essential element in the efficiency of a school system notwithstanding the popular fallacy that the work is easy and the duties unexacting. Constant care on their part must be maintained to keep the rooms heated to the proper temperature, neither too hot nor too cold, but just right under constantly changing conditions without. This may seem an easy matter but my experience proves that it is far otherwise, and it is rarely the case that perfect service is secured without the utmost pains on the janitor's part. The work of heating a schoolhouse is by no means the only part of his care, but cleaning, sweeping and dusting, each has its place and call upon his attention, and each should be done at the

proper time and with due consideration for the cleanliness of the school plant and health of the children and teachers. Besides the general summer cleaning, the floors of all the rooms and corridors should be washed every vacation, and the whole building given a thorough inspection for any chance dirt which the good housekeeper is always on the alert for. The janitor has it in his power to save the city many dollars every year in the care of the school property. The economical use of fuel is especially necessary and can often cover a considerable part of his wages. Each school building furnishes its own problems for the janitor to solve and when he has done so I find that better service is secured for the building and greater saving of expense for fuel is attained.

The material welfare of the school property has been improved during the year in the way of numerous repairs at different buildings. Bowman street schoolhouse has been re-shingled and the roof put in the best repair at a cost of \$200. This roof had been giving us trouble at times for several years and it was only after close inspection that it seemed necessary to give it a complete overhauling.

The boiler at the high school building in regard to which I made mention in my last report has been newly tubed. This work was taken up during the summer vacation and after a careful inspection it was deemed necessary to remove all the old tubes, change somewhat the combustion chamber and put in new ones. This work was done under the direction of Henry H. Stone as mason and W. D. Huse & Sons for boiler work proper.

The fire which occurred on the morning of Nov. 21st, at Harvard street schoolhouse necessitated extensive repairs at that building. The loss was amply covered by insurance. The fire originated near the boiler and had reached considerable headway when discovered, but thanks to immediate response of the fire department the damage was largely confined to the basement and to the smoke

which naturally permeated the rooms above. During the Christmas vacation the building was given over to the workmen under the direction of Mr. O. T. Muzzey, who put it into first class condition, and care has been taken that in the future no similar accident may occur.

The school house at The Weirs has been enlarged in accordance with recommendations suggested in the school report of last year, and an additional room has been built. This is one of the notable events of the year in our department, as it is a far-reaching improvement in many ways. This had become an overgrown rural school with children of all ages brought together under the care of a single teacher who could not possibly, however skillful she might be, give the attention to all that each needed. This has now been changed by an almost equal division in numbers and classes between two teachers who are better adapted to their own particular work. Not until this year have we attempted to do ninth grade work in this school much to my regret, but now with the increased facilities this is easily feasible, and the first class of this grade has been started. Work in this grade has been done for The Weirs pupils in the ninth grade at Lakeport and the children have been transported by train, but the advisability of sending pupils so young back and forth in this way has seemed to me of doubtful expediency. With this change, the boys and girls at The Weirs can secure their high school preparation at home and in fact all their school opportunities have become as good as those of the city proper.

The high school has continued in a prosperous condition during the year. The graduating class sent a large number of its members to college besides those who entered the state normal school. This tendency needs no particular urging on the part of the teachers and should have just a natural growth. Of course it reacts as an incentive to better scholarship, as entrance to higher institutions

depends upon certification which in turn depends upon a pupil's rank.

The number of grammar school graduates entering high school or academy from our last class was a very large percentage and exceeded any other town in the state. This also speaks well for our grammar school work. In fact we have quite a few pupils from other towns who come to us for a year and then enter the nearest high school or academy for their secondary school work.

Through the agency of the Laconia Woman's Club a course in sewing has been instituted in the public schools of the city. This instruction is at present confined to the 5th, 6th and 7th grades. Miss Marie M. Philbrook has charge of the work as special teacher. The value of this training needs no commendation from me as it has had a place in many schools for years and its need has become so apparent to the ladies of our city that they have volunteered at their own expense to maintain a special teacher for a season. With sewing and possibly cooking soon to come for the girls, plans for a suitable course in manual training for the boys should be entertained. A competent instructor should be secured and an appropriation asked for for this specific purpose. We should get a man and combine with Franklin and Penacook and share with them in paying a salary that will command the services of a man of first-class ability. I understand that these above mentioned towns are ready to join with us for this purpose. Two days' time for us would be sufficient, leaving two days for Franklin and one for Penacook. We should be called upon for two-fifths of the salary under this arrangement. It seems fortunate for us to be able to combine with these towns and secure a high-class man. I heartily recommend this matter for your consideration.

I have spoken elsewhere of salaries of a considerable number of our teachers having been raised. This condition of things is not peculiar to our city but is almost

universal throughout the state. One town after another has raised its teachers' salaries and we are no exception to the rule. We should raise the salaries of some of those whose pay has not yet been increased. But even at the present rate of payment more money must be appropriated next year.

In the table below will be found an estimate of our next year's needs, not allowing for any further increase in teachers' salaries.

ESTIMATED EXPENSES FOR SCHOOLS,
YEAR 1911-1912.

Teachers' salaries at present	\$20,675.96
Janitors' " "	1,500.00
Transportation	700.00
Miscellaneous expenses	1,800.00
School books and supplies	1,900.00
Fuel	2,000.00
	<hr/>
	\$28,575.96

I respectfully call your attention to the individual reports of the principal of the high school, music and drawing teachers, and truant officer, which accompany this.

I wish especially to thank your Board for its unanimous and hearty support, the Mayor and the City Council for their courtesy and generosity in appropriating the funds with which to carry out our recommendations. I further wish to thank the Woman's Club for their lively interest in behalf of our schools, and the teachers for their co-operation.

Respectfully submitted,

J. H. BLAISDELL.

REPORT OF PRINCIPAL OF HIGH SCHOOL.

Mr. J. H. Blaisdell, Superintendent of Schools:

Sir:—I submit to you my first official report as principal of Laconia High school, to the administration of which I had the honor to be called last September.

On the opening day of school the names of 148 pupils were placed upon our records, 70 boys and 78 girls; 26 seniors had graduated in June and 56 freshmen came in to fill up the ranks. Even with this unusually large entering class, the total enrollment did not quite equal that of a year ago, and during the first semester the usual and inevitable "dropping out" of pupils has taken place so that our present enrollment is 135.

Many of the pupils who every year leave school do so because they enter with no fixed and serious purpose to acquire an education, and, finding themselves imperfectly prepared to do the work, or beset with tasks too irksome, become discouraged and indifferent.

This condition, too prevalent altogether, is much to be regretted. A city of the size of Laconia ought easily to maintain a High school with a membership of from 200 to 250 pupils.

It is so obvious that not only could we keep in school the great majority of those who enter, but also could attract many others to our courses, if only these courses were adapted to their needs and desires, and school officials in the past have so frequently called the attention of our citizens to this fact that it seems needless repetition for me to comment upon it at this time. But I am decidedly in favor of establishing industrial courses for the benefit of the many whose education will end with the

High school, and that, too, as early as may be expedient.

Nothing of a serious nature has occurred to keep our pupils away from their school duties and the attendance thus far has been very good. In the matter of punctuality, however, I cannot feel so much satisfaction. Tardiness prevails altogether too much among our pupils and the record of the school is by no means a good one in this respect. When we consider that the greater number of cases of tardiness could easily be avoided by making an earlier start for school, or by a little greater effort on the part of the offenders, who are usually only a minute or two late, it is all the more exasperating that such a condition has to exist. That keen pride in making a good record in punctuality and attendance which so strongly characterizes the pupils in the grades is often lamentably lacking in high school students. I hope with the coöperation of both parents and pupils to effect an improvement in punctuality during the remainder of the school year.

We retain this year the services of all the assistant teachers of last year, which is a fortunate thing for the school and a circumstance very much appreciated by me in entering upon the principalship. It would be difficult to find a group of more efficient teachers than those who are now associated with me in carrying on the work of the school, and the esprit de corps is such that excellent results are being obtained in all the departments. This is very gratifying. It should be the policy of school authorities everywhere to make every effort to retain in the public service teachers who are proving their worth to the community in which they labor.

It is with pleasure that I comment upon the splendid work which is being done in the department of music under the thorough instruction and able supervision of Mr. Osgood. Rarely have I heard better singing by a high school chorus, considering its size. We have in school some exceptional musical talent and everything possible is being done by Mr. Osgood to bring it to its

highest development. The chorus is at present working up the cantata, "The Building of the Ship" with a view to giving it a public production in the near future. Steps are about to be taken to organize a glee club among the boys, which cannot fail to prove entertaining and instructive.

I regret that the publication of our school paper, "The Lakonian" has been discontinued on account of the expense necessary to maintain it. Thus the school loses the benefit of one of its most important activities, both in a business and in a literary sense. I hope that conditions will be such in the future that we may soon resume its publication.

Our first half year has passed very pleasantly and, I trust, profitably, and we have now entered upon our second and final semester. The progress of our several classes compares very favorably with that of former years and in some instances greater advancement has already been made at the half year mark, thus more than satisfying the state requirements.

Especially commendable are the spirit and quality of our young people. For the most part they seem earnest in their pursuit of knowledge, and are in a high degree teachable. Our material wants are insignificant thanks to the generous policy of the city by which we are provided with every necessary equipment. The highest and most important needs of the school cannot be satisfied by costly apparatus and showy architecture. These things do not constitute a school, nor do courses and curricula in themselves so much matter. It is to the character of the pupils that we must look in our estimation of the status of the school. Whatever they are the school must be. Realizing this fact, we as teachers must be more effective in our methods of instruction, more vigilant in seeking and finding the best means of developing to the fullest the young lives in our charge. Let us teach them not our fads and our hobbies, but let us teach them with common sense.

And for the part of the pupils, they should learn early to regard their school work not with indifference and lightly, but as serious business. The big things in life, those worth while, go to the men and women who are willing to pay the price. I have always maintained that no better school material can be found anywhere, no pupils more intelligent and receptive than the children of northern New England. In this respect Laconia is surely a representative community.

Composed of such material Laconia High school ought easily to take and maintain its place in the foremost ranks of high schools, equal to the best and second to none in the excellence of its work.

This may seem too much to expect, but I am confident that by increased effort all along the line the desired end may be attained.

With favorable conditions and under proper management the school has before it a bright future of useful activity.

Respectfully submitted,

VERNE M. WHITMAN,

Laconia, Feb. 6.

REPORT OF SUPERVISOR OF MUSIC.

Mr. J. H. Blaisdell, Superintendent of Schools:—

In my last annual report I mentioned the "Harmonic Music Course," which had already been introduced into the first three grades. This system has now reached the fourth grade and is giving excellent satisfaction.

In a few cases teachers were rather skeptical about the new books and were inclined to look with suspicion upon them, but I am very happy to say that later, after becoming more familiar with the plan, they have pronounced themselves converted and are doing good work now.

Music is capable of being treated in logical sequence, and all efforts at every point of the course should be based on what has gone before, and also prepare for what is to follow.

These books make it easy to do this. We are well supplied with books, charts, etc., almost all of it in good condition.

I am very sorry to have to slight the ungraded schools so much, but I cannot see my way clear to do better. By taking the early train to Weirs and beginning work at 8 o'clock Tuesday mornings, I am able to see them and get back to Lakeport to work very soon after 9.5, but the Crockett and White Oaks schools are so situated that it takes a full half day to make the trip and do the work, and in addition I must cancel from 5 to 10 lessons in town. The only solution to the problem would seem to be to give me another half day. My weekly program is here so you can see what I mean.

We are this year more advanced than at the same time

last and we seem to have done it with no more effort which indicates more ability.

It is proper and right at this time to publicly thank all officials, teachers and the people who have made my school year both successful and pleasant.

Respectfully submitted,

FRED H. OSGOOD.

REPORT OF DRAWING TEACHER.

Mr. J. H. Blaisdell, Superintendent of Schools:

In submitting the report of drawing in our public schools for the current year, I will say that the work has been given to the teachers and followed out according to the outline plan given below.

The New Hampshire State course is the foundation upon which all of the work is based, this plan being supplemented by the newest and best helps which can be obtained. Among these are the Prang Educational books, the Parallel Course of Drawing, the Applied Art drawing books, and the School Art books. The latter which is edited by Mr. Henry T. Bailey, a well-known supervisor of drawing in Massachusetts, is a great help toward keeping the smaller schools in touch with the work done in the large cities.

Good progress has been made with mechanical drawing. The text book used by this class is by Mr. Anson K. Cross, with reference books and publications bearing upon the subject. Some of the boys have done original work, machine drawing, and making house plans. Some of these have been re-drawn with ink and blue prints have been made from them.

Several High school pupils have made very good drawings with India ink. Some others have done exceptionally good pencil painting. This in addition to the color work which has been accomplished.

The grade teachers' "Monday night drawing meetings" have been faithfully attended.

I wish to publicly extend thanks to these teachers who

have so harmoniously worked together in carrying out the given plans, and who have labored to bring the best results to the children of our city.

Grateful acknowledgement is extended to all others who have aided in the work.

Respectfully submitted,

ABBY HARLAN JEWETT.

REPORT OF TRUANT OFFICER.

To J. H. Blaisdell, Superintendent of Schools:

DEAR SIR:—I have the honor to present herewith my annual report in tabulated form of all work performed by me for the year ending Jan. 31, 1911.

Resident school children in the city between five and sixteen years	1,640

Number at Sacred Heart school	430
Number of visits to the schools	4,100

Cases of absence investigated	350
Number found employed contrary to law	10
Truancy determined by investigation	15
Put in school by the officer	50
Sent to the Industrial school at Manchester	2
Furnished with clothing, boots, shoes, etc.	25

In most schools of the city but little trouble is experienced from genuine truancy. I find some of the schools are more or less interrupted by absences even caused by the indifference or intent of misguided parents. It is only through a wholesome fear of the law and the untiring effort of the truant officer that a fair attendance can be secured. In such cases there is much more trouble by unnecessary absence than by truancy. It is an evil that affects all schools and all grades, and to a much greater extent than is generally supposed. Boys stay out to carry in wood, and stay away from school to attend ball games, to sell papers and to do chores, to go on errands, to go on visits, or excursions, and some lie in bed until it is too late to attend the morning session; as though school was of secondary importance, and yet the parents consider these a sufficient excuse for absence from school. When the time comes for these boys and girls to be promoted the parents cannot see why they do not pass. The teachers are to blame, of course, even when they stay night after night from one to two hours and help these boys and girls to make up their work.

Some mothers even hide their children in the wood-shed when they see the officer coming, and say that the child is ill. This has been found so a number of times.

I hope that parents and guardians especially, and all who are interested in our schools will exert an influence to lessen this kind of absence and increase the chances of success.

Parents, let us work together and have better attendance than ever. If you will do your part the teachers and officers will go more than half way.

It is with pleasure that I now have this opportunity of thanking the superintendent of the schools and the teachers for their kindness and coöperation during the past year.

Respectfully submitted,

H. E. ROWEN

Truant Officer.

LACONIA PUBLIC LIBRARY.

REPORT OF THE TRUSTEES.

To the Honorable Mayor and City Council of Laconia:

The undersigned, trustees of the Laconia Public Library, herewith transmit to you the reports of the librarian and treasurer of the public library for the year ending December 31, 1910, on the part of the librarian, and for the year ending February 15, 1911, on the part of the treasurer, and respectfully submit them as covering very fully all matters pertaining to the library and its expenses.

We respectfully recommend that the sum of \$3,000 be appropriated for the library for the ensuing year.

JOSEPH H. BLAISDELL,
JOHN T. BUSIEL,
CHARLES L. PULSIFER,
CHARLES F. LOCKE,
CHARLES F. PITMAN,
WILLIAM F. KNIGHT,
JOHN W. ASHMAN.

TREASURER'S REPORT.

To the Board of Trustees of the Laconia Public Library:

The following is my report of all receipts and expenditures for the year ending February 15, 1911.

SPECIAL FUNDS.

HELEN A. AVERY FUND (\$1,000).

Receipts.

Amount on hand February 15, 1910	\$.78
Income from fund during year	42.00
	<hr/>
	\$ 42.78

Expenditures.

For historical, mechanical, scientific and other useful books in accordance with terms of her will	\$ 25.97
Balance unexpended	16.81
	<hr/>
	\$ 42.78

JULIA A. LADD FUND (\$500).

Receipts.

Amount on hand February 15, 1910	\$ 21.72
Income from fund during year	18.91
	<hr/>
	\$ 40.63

Expenditures.

Books purchased	\$ 18.46
Balance unexpended	22.17
	<hr/>
	\$ 40.63

GENERAL FUND.

Receipts.

Amount on hand February 15, 1910	\$ 249.61
Fines collected	147.18
Bulletins sold	4.15
Reserving books	4.10
New cards	2.60
Lost books	5.00
Non-resident fees	3.14
Miscellaneous	5.01
Part of carload of coal sold	40.59
Trustees of Napoleon B. Gale estate for advances on park	122.90
Trustees of Napoleon B. Gale estate, $\frac{3}{4}$ of in- come for year	2,626.79
City of Laconia, appropriation	3,000.00
	<hr/>
	\$6,211.07

Expenditures.

Salaries	\$2,330.67
Transporting books to and from The Weirs . .	53.65
Transporting books to and from Lakeport . .	68.59
Binding and rebinding	137.25
Printing, stationery and postage	237.10
Fuel	475.07
Lighting	221.01
Telephone	40.50
Repairs	46.53
Express, freight and trucking	34.26
Water for building	2.34
Sprinkling streets	22.50
Miscellaneous expenses and supplies	166.82
Library Art Club, annual subscription . . .	6.00
For exchanging typewriters	45.36
Wiring of basement for electric lights . . .	122.53
Silver plate for case of the E. P. Jewell Indian relics	24.25

	<hr/>
	\$ 852.71

Respectfully submitted,

JOHN W. ASHMAN,

Treasurer.

REPORT OF LIBRARIAN.

To the Honorable Board of Trustees of the Laconia Public Library:

Gentlemen:—I have the honor to present to you my eighth annual report. The statistics of this report are for the calendar year 1910, while the treasurer's report is for the fiscal year ending 15 February, 1911.

The librarian addressed the city council in March on the need of a larger appropriation and later explained the situation to as many members of the council individually as opportunity permitted. He found those with whom he talked disposed to vote for a reasonable appropriation. At the meeting of the council on May 31, \$3,000, the full amount asked for by you, was appropriated without a word of objection or a dissenting vote. Five months of the year had already passed and it was not possible in the remaining seven months to make up the loss in circulation of those five months. The circulation at the main library in the year ending 31 May 1910 lacked 5,020 of the number loaned in the year ending 31 May 1909. While you had assurances of a larger appropriation, it did not seem wise to order new books until the money had been voted by the council. In consequence of the large cut in the appropriation in 1909, only 469 new books were accessioned in the year ending 31 May 1910. Of this small number, 48 were books of reference, mostly in continuation of sets, and 115 were bound periodicals, from the standing appropriation for that purpose. Of the remaining 306 books accessioned, 22 were gifts that have not been loaned.

As soon as possible after the appropriation was made,

new books were ordered. Only a few could be prepared for circulation before the librarian started for Macinac Island to attend the annual meeting of the American library association. In the last seven months of the year 898 books accessioned. These were catalogued as rapidly as possible without neglecting other duties no less imperative. If all these new books could have been ready by the first of July, the circulation for the year would almost certainly have shown an increase, but there were not enough new books at any time to meet the demand. During the summer, an agency of the Booklovers library was established in the city and many of our patrons obtained there the new books we could not supply in sufficient numbers to satisfy them. For the six months from June to November, inclusive, there was a net loss of 451 volumes circulated. By that time enough new books had been made ready to turn the tide. December circulation showed a gain of 97 at the main library. At this time (6 February 1911) there are 88 (13%) more books charged out at the main library than there were a year ago. The circulation for January, 1911, was 235 (8+ %) more than in January, 1910.

For the first time an attempt was made, this year, to ascertain how many registered borrowers drew books during the year. This was not done in season to insure absolute accuracy and it was not possible, in the limited time, to avoid counting twice those who obtained books from both libraries. The count is believed to be approximately correct, however. It appears that 1896 persons drew books at the main library and that 222 used their non-fiction cards to obtain classed books. It is reasonably certain that at least one person in five of the 10,183 residents found by the census enumerators actually borrowed books at one library or the other. When the fact is considered that a very considerable number of the residents cannot read books printed in English and that no new French books were bought during the year, these figures show a fair use of the library.

The new appropriation made it possible to obtain equipment that you had previously authorized, the purchase of which had not been made because of lack of money in 1909. Two Danner revolving bookcases, 32 inches square and five shelves high, were placed in the delivery room, near the desk. One of these cases is used for books printed in the French language and for the best fiction among the old books. The titles of the fiction in this case are taken from the A. L. A. catalogue in alphabetical order by authors. French books are returned to the case after circulation. Fiction goes to the stack when returned by borrowers. The space left by fiction loaned is filled by new selections. Thus the fiction in this case is constantly changing. Books not loaned in a reasonable time are returned to the stack. The other case is kept filled with the latest classed books, which are returned to the case after circulation. The inspection shelves at the left of the loan-desk are used for the new and popular fiction. The new and popular juvenile books are kept on the shelves at the right of the desk. About 750 books are thus kept where they may be examined by the public and our patrons know where to look for the kind of book they desire. This arrangement seems to please those who want to see a book before it is charged to them and saves much time in bringing books to the desk for inspection.

Two 18 inch globes were purchased for the entrance hall. One was a terrestrial and the other a celestial globe. A Seth Thomas calendar clock was placed near the loan-desk where it can be seen from the delivery room or the reading-room. For more than seven years we had depended upon the city clock or on timepieces provided by the staff. The drawers at the loan-desk were full and there was no place to keep the supplies and the tools where they could be protected from dust and out of sight when not in use. The flat top, six drawer, desk provided by you for this purpose is very convenient. It has also greatly improved the appearance of the space behind the

loan-desk. The Hammond typewriter that had been in constant use for seven years was exchanged for the latest model. The old machine did as good work as ever, but the bicrome ribbon feature of the new model makes it possible to write the subject headings for the catalogue cards without removing the cards from the machine. This saves considerable time in cataloguing. The librarian had previously used his own machine with a red ribbon to write the headings. A special cataloguing shuttle and three extra shuttles were obtained with the new machine. One of the extra shuttles is used for correspondence, another for writing italics, while the third is used when it is desirable to write as much as possible on a single card. Twice as much can be written with the third shuttle as with the others in the same space.

The necessity for repairing an electric fixture led to the discovery that conditions existed in the basement that might have caused death to anyone turning on a light at any time. This led to the installation of a completely new system of lighting the basement. It was a costly job, but the safety in use and the saving of time in finding what is wanted fully justified the expense. We now have four times as many lights as before and others can be added at trifling expense as needed. Any part of the basement can be well lighted and any book or pamphlet can be found at night as easily as in the daytime. The librarian of the Lakeport branch mounted the remaining pictures on hand. We now have 1,277 mounted pictures. These will be classified and arranged so they can be loaned to schools or clubs in groups as desired. Some of these have been shown in the entrance hall when we have had no exhibit from the Library art club. They seemed to interest the public as much as the regular exhibits.

Soon after the appropriation was made, the teachers of the high school were invited to prepare lists of books they could use to advantage in their school work. Mr. Hubbard prepared a somewhat lengthy list of historical works.

Those that were not already in the library were purchased with the exception of a few costly sets. School editions of special poems and selections to be read by a considerable number of pupils were purchased, so the complete works could be available for other patrons. Lists of required reading for each class at the high school were posted on the bulletin board at the main library and filed at the branch.

After the appropriation was made, each auction catalogue from C. F. Libbie & Co. was examined and a bid was mailed for such books as were needed. An offer was made for every New Hampshire town history not in the library and for other books about the state. An early edition of Belknap's History of New Hampshire and the first six volumes of the Collections of the New Hampshire historical society were thus obtained; also six town histories, extra fine editions of the complete works of Dickens, Fielding, Scott and Shakespeare, and the last 25 volumes of the Literary world. These were bought for less than half what a dealer would have charged for them. The sets of Dickens and Scott are especially valuable because we had no editions in good type. We paid only 50¢ a volume for them.

In addition to the partial set of the Literary world obtained at auction, our set of the Outlook from volume 75 was completed and bound; the New England magazine from volume 29 to date was completed and bound; the first 20 volumes of the American review of reviews, already bound, was purchased and the issues necessary to complete our set to date were obtained. The remaining volumes are now at the bindery. Completed volumes of our sets were bound as soon as possible after the title-pages and indexes were received. The total expense came within the annual allowance of one hundred dollars.

In all my previous reports, the whole number of volumes in the library was based on an estimate of 10,000 old books moved into the new building in June 1903. Of those

books, 942 classed books and all the government documents have not been accessioned or catalogued. During the past year, the librarian made a careful count of all books not accessioned and of the public documents. The number given in the statistical summary in this report is believed to be approximately correct and will be used as a basis for future reports until the remaining volumes are accessioned.

The circulation at the main library was less by 2,603 loans in 1910 than it was in 1909 but the loss was partly offset by the gain of 1,177 at the branch. Books were not loaned from the branch until 8 March 1909. The net loss in circulation, therefore, was only 1,426 or 3.3%. At the main library, more books were loaned in philosophy, religion, philology, natural science, fine arts, drama, oratory and satire than in 1909. The same number were loaned in sociology and letters. All other classes show a loss in numbers. The largest gain for the year was in the use of books and periodicals within the building. The number of books, pamphlets and periodicals loaned thus was 991, a gain of more than 25%. Even this does not show the real gain because a bound volume of a periodical counts as one while the same volume before it was bound counted as six or more. The increase in the number of bound sets adds greatly to the value of the library for reference and study, but the actual increase in use is not shown by the number of loans. Reference work has increased rapidly since we began binding periodicals. The periodical indexes locate material that would otherwise be unavailable. Students come here from Tilton to prepare debates, essays and orations. One of these told me he received more help here than at Concord. The government documents with their indexes and Miss Phillips' card index for the more important pamphlets provide reliable information on a large variety of topics.

The number of readers counted in the week after Thanksgiving was 143 less than during the same week in

1909 and less than the number counted in a week in any previous year; but the librarian and all the members of his staff believe that more serious reading and study was done in the library than ever before. During the week when the count was made, there were outside attractions that affected the number of readers. Formerly a large number of high school scholars came to the library directly from school. Many of these pretended to read or study but really disturbed others and received no benefit themselves. During 1910 whispering or low conversation was allowed in the study room when it appeared to be about school work and there were no other readers in the room. When it was evident that someone was deliberately breaking the rules with no desire to do serious reading or study, the person was sent out and told not to return until he could behave properly. He was not allowed to use the room until he promised to comply with the rules. This method reduced the number of readers but largely increased the use of the room for study.

Miss Helen M. Jones, who had been our Saturday evening assistant and substitute since June 1908, became librarian of the Lakeport branch on the first of April. Mr. Herbert A. Jones, after instruction in the work of the loan department of the main library, became the assistant librarian at the branch. Miss Jones continued to serve at the main library when needed, Mr. Jones substituting for her at Lakeport. In October, she married Mr. Rush H. Van Meter and resigned. Miss Bessie M. Black became the Saturday evening assistant and substitute the first of the new year. In the summer, the librarian attended the meeting of the American library association at Macinac Island, at his own expense. He found the meeting very helpful and inspiring. He would be glad to put some of the new ideas into his practice in this library if time and money permitted.

The limit of accomplishment with the present staff has been nearly, if not quite, reached. The librarian has

taken no vacation since he began his service 1 June 1903. At the end of the year 1910, he lacked only 82 hours of having averaged eight hours of work for every day, except Sundays and legal holidays, since that date. He worked $2,470\frac{3}{4}$ hours in 1910, exclusive of time spent in attending the meeting of the American library association. No time was counted that was spent reading daily papers, or entertaining private callers or in private business of any sort. Time was reckoned from the minute he began work to the minute he stopped work for the library. He believes that no other librarian in the country actually worked more hours on strictly library work than he did in 1910. He has tried working more than an average of eight hours a day, but he found he could accomplish no more work by so doing. However, the work that no one else on the staff can do has grown to such an extent that he cannot do what ought to be done. He cannot properly select, purchase, accession, classify and catalogue all the books that should be bought, do the needful reference work, attend to the correspondence, keep the records, and administer two libraries. He would gladly work more hours, but he has reached the limit of his strength.

The librarian can not state more strongly than he has already stated in previous reports the urgent need of a children's room. Little children cannot use the reading room or the study room without disturbing older readers. They use and wear out costly reference books and periodicals in their search for pictures or amusement. Their very restlessness, even when they try to be quiet, disturbs others. It does not seem possible that anyone would shut them out of the library altogether and yet their presence doubtless deters many from coming to, or remaining in, the library. Meanwhile a suitable room in the basement is used only for storage when it might be fitted up, at comparatively small expense, for the use of the children. Those with whom the librarian has talked on the subject are almost unanimous that this should be done. The

council can not be expected to appropriate the necessary money unless the public shows some interest in the matter. If everyone who believes that the children should be provided with a room to themselves in this building were to talk with their friends about it and were to ask the council for the appropriation, the room would be made ready next summer. In such a room, all the books and periodicals would be suitable for their use and the wear on costly books would be saved. They would be helped and guided in the selection of books and taught how to use a library. An untrained person could be employed at reasonable expense and taught how to work with the children, but it would take much of the librarian's time that is urgently needed for other work. He believes that the time has come when the highest interests of the city demand the service of a trained librarian who would work with the children and with the schools. She would select, classify and catalogue the books for the children's room. She would consult with the teachers and prepare references for the scholars. She would relieve the librarian of some of his duties so he could find time for other work that he wants to do. A list of books has come from the superintendent of the Laconia car company with the suggestion that the books would be very useful to ambitious young men in their employ. These books will be bought. The librarian would be pleased to meet other employers in the city and obtain books that would serve their employees. He would be glad to prepare a reference collection for business men that would enable them to find the information they need promptly. He would like to prepare lists of references on current topics of the day and have these printed in the local papers. He would gladly do far more than he is doing now to aid clubs in their search for material on their particular lines of study. He would be pleased to assist citizens in the selection of books for their private libraries or their special needs. He desires to make the library an information bureau to a

far greater extent than it is now. He frequently answers questions of orthography, geography, history and orthoepy by telephone; but he would like to advertise widely that any question on any topic may be asked in person or by telephone and answer will be made if the resources of this library or others permit.

When the new city directory is issued, citizens can help the library by sending us their old directories. These will be exchanged for directories of other cities and thus a valuable collection can be obtained at no expense except for correspondence and transportation. The directories thus obtained will not be the latest editions, but a directory that is a year or two old will often serve the purpose as well as the latest. We already have some calls for directories of other cities and there would doubtless be more if the business men of the city knew they could be found here.

In my sixth report, I stated that the stack was nearly filled and that another floor should be added in 1909, unless the children's room should be fitted up to receive the juvenile books. Since that report was written, about 1200 books have been sent to the Lakeport branch to remain and about 160 other books are kept there all the time, being exchanged every two months. The revolving bookcases provide shelving for 600 books and fewer books were bought that year than usual. So the second floor has not been needed. The first floor is filling up, however, and the second floor will soon be needed unless the juvenile books are shelved in the children's room. Another bookcase must be provided for public documents in the basement in 1911. The drawers at the loan-desk are crowded with cards that must be consulted often by the desk attendants. The index cards for government and other pamphlets are accumulating rapidly and trays are needed for them. A card cabinet for loan-desk records and these index cards should be provided next summer at the latest. The allowance of one thousand

dollars a year for books is reasonably satisfactory under present conditions, but a much larger sum could well be used if a staff could be provided to prepare the books for circulation.

A copy of the New Hampshire Democrat, printed in this city in November, 1854, was presented to the library by Mr. Horace G. Whittier of the Lakeport ward. The Laconia press association presented four more bound volumes of the Laconia Democrat during the year, bringing our set down to 1908. These back files of the Democrat are often consulted and are very valuable. Postmaster Julian F. Trask gave six bolos that he brought from the Philippines. A special case should be provided for these. To the above friends of the library and to the donors mentioned below the thanks of the library are hereby extended.

LAKEPORT BRANCH.

The Lakeport branch has been in operation nearly two years. It is no longer a novelty. The normal use can now be reasonably estimated. The statistics in my last report were for the period from 8 March to 31 December 1909. The following statistics are for the full year 1910. The circulation was 6,427, a gain of 1,177 or 22+%. The daily average circulation was 21.14, a gain of only .23. Twenty-two books were loaned on teacher's cards, a gain of 5.7%. Three hundred and thirty-seven different persons drew books from the branch during the year and 28 patrons used their non-fiction cards. About 15% of the population of the ward used the branch.

Miss Sarah E. Sturtevant presented 8 excellent books on pedagogy that ought to be useful to the teachers at Lakeport. The wife and daughter of Governor Quinby gave nine and seven books of popular fiction respectively that were much appreciated by the patrons. The Village improvement society added to its previous benefactions a settee for the porch, a magnolia for the front lawn and two fir trees for the rear of the lot.

In the hurry of preparing my last report, a book in paper covers was counted as a book. As such books have not been thus counted elsewhere, a correction is made this year. It is believed that the statistical summary is now correct in that respect. The writer has found no time to catalogue the few books belonging to the Ossian Wilbur Goss Reading Rooms and the librarian of the branch has not learned how to catalogue them. They have been accessioned, however, and are loaned as other books.

Ten books in fiction, one classed book and two reference books were bought for the branch during the year. A condensed accessions book was bought and a record of donated books was made in this. Lists of books, consisting of five out of every forty added to the main library, were prepared in alternate months. On the first library day of January, March, May, July, September, and No-

vember the exchange of books on the previous list for those on the new list was begun and continued until all on the new list were received and those on the preceding were returned. The exchanges were made without any interference with the circulation. A maximum of 160 titles were included in each list. This plan provided a frequently changing collection of books of all classes. Within a period of sixteen months, every book, added to the main library for circulation, goes to the branch to remain about two months. However, any book at the main library or at the branch that is especially needed at the other library or on which a patron places a reserve is recalled at any time. If the book is out at the time, it is sent as soon as it returns. The permanent collection of books at the branch 1 January 1911 contained 1,190 volumes. Three hundred and fifty-one works of fiction and 369 classed books were received from the main library by the bi-monthly exchanges and 929 books were obtained for patrons of the branch by number cards. It would seem that residents of this ward have fully as good opportunity to obtain the reading they desire as those of any other ward. They can draw books at the main library when there is no charge on their library card.

The preparation of the report of the branch last year demonstrated clearly that Mrs. Sargent could not be depended upon to keep accurate records, without instruction which the librarian could not spend the time to give at the branch and which she could not receive at the main library while in charge of the branch. She was very popular with the patrons and was very conscientious and obliging, but so much of the librarian's time was required for close personal supervision that a change became imperative. Miss Helen M. Jones, who had served as Saturday evening attendant and substitute at the main library about two years, was placed in charge of the branch on the first of April. Previous to this time, Mr. Herbert A. Jones served at the loan desk at the main library until he

had learned the regular routine. He became the assistant librarian and substitute at the branch when Miss Jones was made librarian. His experience in business and in public office made him accurate and reliable. Miss Jones was married in October and resigned as librarian at the branch and substitute at the main library. While employed at the branch, Mrs. Van Meter mounted all the pictures that were ready. She did the work very nicely and our 1,277 mounted pictures will long bear testimony to her skill and neatness. She will be succeeded by Mr. Jones the first of February.

Mr. Edgar H. Elkins, who had carried the books three years, resigned to enter Dartmouth college. He had always been prompt, courteous and reliable. It was difficult to find anyone to take his place. Finally, Mr. Gardner H. Jones, who had carried the books a year and a half before going to college, was persuaded to take the position again. As he is employed at the freight office, near the library, and lives at Lakeport he is able to give excellent service. Beginning the first of September he has exchanged the books twice a day. Books left at the branch after noon come down the next morning. Those left before noon come down early in the afternoon. Books are sent to the branch at noon and at night. Thus a book may be left, or an application for a card may be made, at the branch before noon and a new book, or a library card, will be ready for the patron at the branch after 6 p. m. of the same day. I do not know of any other instance where two exchanges a day are regularly made between a main library and a branch.

In the summer a 60 tray cabinet was placed in the branch to receive the catalogue cards prepared for all books catalogued since the branch was opened for circulation. The cards are added weekly. This enables the patrons to ascertain the call number of any new book they may desire from the main library. The librarian was at the branch every Friday afternoon in the year except while

absent from the city attending the meeting of the American library association. He would be pleased to meet anyone there any Friday between 3.30 and 5 p. m. to render any assistance possible or to receive suggestions for the improvement of the service.

TENTH ANNUAL REPORT OF BOARD OF PUBLIC WORKS.

To the Honorable Mayor and Council:

In submitting its tenth report, this board thanks you for the hearty manner in which you have favored its recommendations and made the necessary appropriations to carry forward the work of improving our streets. Under the efficient direction of the street commissioner, Mr. C. A. French, a large amount of work was undertaken and carried to completion. The paving of the two squares and Pleasant street has added much to the good appearance of our city and the convenience of every one. The extension of the sewerage system in the several localities designated by you has been completed; the board decided to do this by the day rather than by contract and we believe the results justify this action. Our citizens generally approve of the improvements made upon the principal thoroughfares and urging a continuance of the work, we strongly recommend an appropriation sufficient to complete Union avenue from Casino square to Mechanic street, which will give a macadam road from the Belmont line to the Weirs boulevard, excepting a short distance from Walnut street to Stark street. We desire to call to your attention a very dangerous place at the corner of Union avenue and Stark street, and hope that you will deem it advisable to make some changes here, after which the avenue can be permanently improved. All departments under the control of this board are in excellent condition. By the accompanying report of the street commissioner you will be in-

formed in detail of the expenditures in the various departments, unexpended balances, property as inventoried and other matters of interest. We recommend that appropriations for next season be as follows:

General appropriation	\$13,000.00
Re-covering concrete sidewalks	1,000.00
Treating new roads with oil	1,000.00
Engineer's department	700.00
Sewer department	1,000.00
Surface sewers, Pleasant street	\$500
Lyford street	800
	<hr/>
	1,300.00
To complete Highland street extension	500.00
Tar macadam, Union avenue from Church street to Mechanic street	11,500.00
	<hr/>
	\$30,000.00

J. HENRY STORY,

JULIUS E. WILSON,

GEORGE H. TILTON,

Board of Public Works.

REPORT OF STREET COMMISSIONER.

To the Board of Public Works:

GENTLEMEN:—I have the honor of presenting the annual report of this department for the year 1910-11.

During the year Mr. F. W. Shaw, foreman of division No. 2, resigned to take up other work and Mr. W. J. Greenlay was advanced to the place made vacant. Mr. Shaw has done excellent work in his department and his resignation was accepted with regret.

BANK SQUARE AND PLEASANT STREET.

An appropriation of \$4,500 was made for the purpose of paving Bank square and subsequently \$3,500 was added to pave Pleasant street to the tracks of the Boston and Maine railroad. A bituminous pavement, coal tar and asphalt, laid on a four-inch cement base, was decided on and the contract let to L. M. Pike & Son, who were the lowest bidders, at a price of about \$1.56 per square yard, which included all grading and materials.

There was laid 4,833 square yards of bituminous pavement, 459 square yards of granite block gutter, 658 square yards of granite block around car tracks and 1,088 Lin. feet of granite curbing was set. Drains, manholes, catch basins, etc., were rebuilt and set to the proper grade.

Water and gas mains coming under the pavement were renewed where necessary, in order to avoid disturbing the street surface in the near future.

The total cost of the work was \$8,679.23, which was \$679.23 in excess of the appropriations given.

BRIDGES AND CULVERTS.

Repairs and renewals were made to the various wooden bridges and one steel concrete bridge was built at Highland street. Elm street bridge was rebuilt in 1906, but during the summer it was found necessary to re-plank the entire roadway and make repairs to the sidewalks, at a cost of \$318.55.

Many of the stringers and other timbers left in 1906 are now badly decayed, and it is only a question of a short time when the bridge must be rebuilt.

Fair street bridge.—The roadway of this bridge was entirely re-planked early in the season and other repairs made.

Academy street bridge was partially rebuilt, but many of the old timbers were left in and the planking is about gone, except where renewed. I think that it would be advisable to replace this structure with one of concrete as soon as possible.

Garfield street bridge was rebuilt of wood and will probably last three years without extensive repairs.

Davis Place bridges were again repaired this year, but their life will be very short.

Main street bridge, built in November, 1901, is getting weak in places, and during the summer the east roadway broke through and it was found necessary to reinforce underneath and give the wearing surface a coat of paving material. These repairs were temporary and the question of a new bridge must soon come before you. The sidewalks are now very poor and that part of the structure under the car track is rotting badly.

The Messer street bridge, while not called upon to bear the traffic of the Main street bridge, is getting too weak to bear the strains put upon it and must be soon renewed.

The steel bridge at The Weirs, while in good condition, is also called upon to bear heavier loads than the design would warrant.

The bridges at Black brook on Union avenue and at

Durkee brook on Court street could be replaced with concrete structures at a comparatively small expense and eliminated from the maintenance charges.

Mill street flume.—The wooden structure over the power canal on Mill street broke through during the winter of 1909, and by agreement with the owners I made plans for a steel concrete structure. These plans were carried out as the owners, J. W. Busiel & Co. and the Belknap Mills Corporation, agreed to pay their proportionate share of the cost of the work. The work was done by the Wallace Building Co. and the steel furnished by the Laconia Car Co. Works. This is a permanent structure and will need no more attention.

Minor repairs were made to other bridges and culverts, but the following season will call for as many repairs if not more than the past.

The Highland street bridge over Jewett brook was built during the summer. Split stone abutments and wing walls were built and the superstructure of reinforced concrete and steel I beams with concrete curbs and iron railings. The span was twenty-five feet and the width over all forty feet.

The contract for the abutments was let to H. J. Gagne, the steel and railings to the Laconia Car Co. Works and the concrete work to the Wallace Building Co. The total cost of the bridge was \$1,329.68 and it is a permanent structure.

CLEANING STREETS AND CATCH BASINS.

A horse-drawn Menzie pick-up sweeper was bought which works well on smooth pavements and is an economical device. The machine makes but little dust and can be used at all times of the day.

Streets and catch basins were cleaned at regular intervals and 234 loads of waste were taken from catch basins and disposed of.

CONCRETING (RE-COVERING SIDEWALKS.)

The appropriation given was hardly enough to do the work required and a small draft was made on the general appropriation.

DRAINS.

Drains and catch basins were built in and near Railroad square in anticipation of the pavement which was laid there. Twelve hundred feet of fifteen-inch drain was built on North Main street, northerly of Tremont street, together with the necessary catch basins and manholes.

A twelve-inch drain was laid from Lake Winnisquam, through Whipple avenue, Pleasant street and Harvard street to connect with the drain previously built in Middle street. Lateral branches were laid and twelve catch basins and three manholes built.

The total length of the above drain was seventeen hundred feet. Many catch basins with their connections were built in various parts of the city.

No appropriation was made to extend the drain from Gale avenue into Pleasant street, but this work should be done.

Drains are needed on High street, Highland street and on Tower street at The Weirs.

GENERAL REPAIRS AND COUNTRY ROADS.

Owing to the very wet weather when the country roads were repaired much of the work had to be done again and the usual annual expense was increased.

All the ashes and cinders collected by the scavenger service, were used on sandy roads.

Standard road oil, No. 3, applied to ash or cinder roads gives good results and prevents the dust and breaking through, incident to dry weather. The cost is about two and one-half cents per square yard and the results would seem to warrant the expenditure.

OILING PLEASANT STREET.

Your board has received many requests from abutters on streets subjected to heavy automobile travel, to sprinkle with either water or oil, and in many cases they have expressed their willingness to bear their proportionate share of the expense. In compliance with a similar request from abutters on Pleasant street, oil emulsion was applied to that section of the street from the tracks of the Boston and Maine railroad to Oak street; the cost kept and apportioned to each abutter on the basis of the number of feet of frontage which they own. The results were not altogether satisfactory.

REGULATING STREETS.

Some grading was done on Belknap street in accordance with an appropriation of \$500 given you, but the matter of surface drainage seems to prohibit any more work until the matter can be adjusted.

A similar condition exists on Strafford street, and the problem seems to be either the construction of drains or the raising of the surface of the street and the surrounding property. In case the latter was done, it would be necessary to raise some of the houses and the expense would be considerable.

RAILROAD SQUARE.

An appropriation of \$3,650 was made to pave Railroad square and the balance to be used in continuing the tar macadam construction on Union avenue. Nineteen hundred dollars was expended on the square, curbing was set, gutters paved, drains and catch basins built and other underground structures regulated.

Vitrified brick were laid against the rails of the street car tracks but the results were not satisfactory as the brick have a tendency to work up owing to the light construction of the track and the play up and down caused by the heavily loaded cars.

With heavy girder rails paving blocks could be used

with success but there seems to be no construction that will stand around the track as at present laid.

An asphalt-tar pavement was laid on a five-inch crushed stone base at a cost of about eighty-two cents per square yard, and the results at present are very good indeed.

SIDEWALKS.

Crushed stone sidewalks were built on portions of Winter and Garfield streets, and in other places where streets were re-graded or re-surfaced.

The annual appropriation for sidewalks did not allow of the construction of much new work, although there are petitions and demands for new sidewalks in various parts of the city.

TAR MACADAM.

4700 square yards of tar macadam were laid on Court street, 470 square yards on Main street, and 2630 square yards on Union avenue, north of Railroad square, at an average cost of 61.5c per square yard, including the removal of the old surface and the preparation of the sub grade.

The method of construction, with modifications, has been in use here for three years and the results are good and economical. There are several bitumens now on the market which give good results when properly used, and the manufacturers are constantly improving their products.

As there are still many of our heavily traveled streets that are in need of surfacing, it is to be hoped that a liberal appropriation will be made for such work in 1911.

TREATING MACADAM ROADS.

Three methods of treatment were used in 1910 and all produced good results.

The water bound macadam was treated with Standard Road Oil, No. '3, at a cost of about 2½c per square yard.

The tar macadam areas built in 1909 were treated with

Tarvia B and sand at an approximate cost of $3\frac{1}{4}$ c per square yard, and the sections laid in 1908 were treated with a flush coat of Tarvia X7 and sand. The Tarvia heated to about 200 degrees, spread at the rate of 4 gallons per square yard and covered with clean, sharp sand in sufficient quantity to take up the tar. The cost of the latter treatment was about $6\frac{1}{2}$ c per square yard. The total cost of all the treatments applied was \$1,293, and the results would seem to warrant the expenditure, although it was \$483 in excess of appropriations.

These treatments not only served to keep down the dust to a considerable extent, but prevented excessive wear on the road surfaces. In fact streets that have been subjected for three years to heavy team and automobile traffic show surprisingly little wear.

Just how much treatment will be needed in 1911 is now difficult to say, but I would recommend a liberal appropriation to cover this work as it has demonstrated its economy.

WINTER EXPENSES.

Plowing and sanding walks and breaking roads cause a considerable expense every year, and repairs to snow rollers and snow tools this year have increased this amount.

As this department is caring for about forty-five miles of sidewalks it is manifestly impossible, with the regular force of men and teams, to cover them all in a short time either with sand or with snow plows, but every effort is made to accommodate the public quickly.

STATE AID ROAD.

An appropriation of \$1,500 was made in 1910 to be added to a like amount from the state.

The work of improving the lines and grade of The Weirs boulevard in accordance with the wishes of the governor and council has been continued, but we were obliged to stop work on account of freezing weather.

The work consisted of widening and straightening the roadway near the estate of Paul Barnes, and the relocation and building of the section from the estate of W. F. Knight to Endicott street. The abrupt curve onto the approach to The Weirs bridge has been done away with, and when the work is completed the two worst places on this line will have been rectified. The very heavy automobile travel over this portion of the Merrimack Valley road during four months of the year entails a considerable draft on the appropriation for general highways to keep it in repair, and it is hoped that a maintenance sum will be given from the automobile fees received by the state to assist the city in this work.

SCAVENGER SERVICE.

One thousand, eight hundred and thirty-one loads of ashes and waste were collected by this department during the year 1910-1911 and disposed of at a cost of 74.5c per load.

There are outstanding bills due the highway and bridge account to the amount of \$768.16.

Respectfully submitted,

CHAS. A. FRENCH,

Street Commissioner.

The amount expended during the year ending Feb. 15th, 1911, is \$33,295.25, and I have itemized it under the following headings:

1	Bank square and Pleasant street	\$8,679.23

REPORT OF CITY ENGINEER.

To the Board of Public Works.

Gentlemen: The increased appropriation given this department the past year was a great help, but still much of the work done for the sewer department was charged to the appropriation for sewer construction.

I will still again call your attention to the great need of a complete survey and plans of the thickly settled portion of the city from which plans could be made for use by the board of assessors.

Although many streets are now carefully surveyed and stone monuments set, it has been impossible to connect these separate surveys with the means at hand. Although each monument is now "tied in" to neighboring objects by careful measurements, in a few years' time these neighboring objects may have been destroyed or removed and great difficulty will be experienced in picking up the street lines.

The layouts of many of the older streets are indeterminate from the existing records, and as time goes on it will be more and more difficult to fix the exact lines of these streets.

The few dollars that would be expended in doing the work above mentioned would be returned many fold, not only in increased assessable property but in saving labor and complications in the future.

The tax payer looks to the city engineering department to determine for him the lines and grades of the streets on which he abutts, and many times it is impossible to give him the information that he asks for although every effort is made to do so with the means at hand.

An appropriation of \$1,000 for 1911 would go a long way toward surveying and plotting that section of the city most in need of such attention, and would furnish a triangulation and base for all future work.

Following is a brief summary of the work done in this department for the past year.

SURVEYS.

Mill street flume, Sheridan corner North street, pipes in Bank square, Pleasant street, Union avenue, Main and Court streets, New Salem and Cross streets, Centenary avenue, Cook's court, The Weirs boulevard, for relocation, etc.

SURVEYS AND GRADES GIVEN.

Drains in Railroad square and Union avenue, Fenton avenue and Cross street, sewer; Court street, paving; Strafford street, Merrimack street, sewer; Central street, sewer; McIntyre & Carroll, sewer; Varney, sewer; Wyatt, sewer; Whipple avenue, drains; Cottage street, sewer; Baldwin street, sewer; Lovell street, sewer; Warren street, sewer; Gilbert street, sewer; Grant street, sewer; North Main street, sewer and drain north of Tremont street.

LEVELS TAKEN.

Jefferson street, for sewer; cross sections of boulevard. cross sections of Bank square, Pleasant street and Railroad square; culvert near Railroad square; Winter street, Joliette street for sewer, etc.

GRADES GIVEN.

Central street wall, curbing near Bank square, Winter street sidewalk, Bank square, Pleasant street, Railroad square, Court street and Union avenue, pavements; Lincoln street, sidewalk; Highland street bridge; sidewalks on Oak, Belknap, Lyford and North Main streets.

Locations were given for water and gas mains and for poles and structures of the electric light and telephone companies.

Estimates, preliminary and final, were made for the various pieces of work undertaken during the year, and measurements made for house numbers, notices sent and records made and filed for future reference.

Respectfully submitted,

CHAS. A. FRENCH,

City Engineer.

REPORT OF SUPERINTENDENT OF SEWERS.

To the Board of Public Works:

GENTLEMEN:—There has been no blockage of the main sewers during the past year and the only trouble experienced was the freezing of the 6-in. sewer on the southerly end of Court street, where it was found necessary to excavate and thaw out about 200 feet of the same.

I have built two new manholes on this line and expect in case of another freeze up that the sewer can be thawed out without disturbing the street.

Roots were removed by means of cutters from some of the smaller laterals and manholes built in several places in order to give easy access to the pipes.

None of the automatic flush tanks were in use the past year and no difficulty was experienced from the discontinuance of the same.

There were issued one hundred and nineteen permits to connect buildings with the sewer, an increase of eighty-five over the number issued the previous year, but there are many houses still unconnected and every effort should be made to reduce the number in 1911.

A bond issue of \$20,000 was authorized by the city council, the proceeds to be used for the construction of new sewers on the following streets authorized by the council: Fenton avenue, Grant street, Cottage street, Baldwin street, Merrimac street, North Main street, Dewey street, Cross street, New Salem street, Sheridan, Belvidere and North streets. Central street was afterward added to the list. Sewers were laid in all the above mentioned streets with the exception of Warren, Dewey, New Salem and Belvidere, North and Sheridan streets. The

work was stopped by freezing weather but can be resumed in the spring.

There was built 7,642 feet of sewer, varying in size from six to ten inches in diameter, 38 manholes, 11 lamp holes and an outlet of three hundred feet of cast iron pipe laid into Lake Winnisquam at Fenton avenue.

It was found necessary to re-grade many of the streets in which sewers were built, to obtain sufficient covering over the pipe and there is more of this work to be done when the weather will permit.

A great deal of rock and ledge was encountered on some of the streets on Pine hill which necessitated blasting, and quicksand on Cottage and Baldwin streets added to the cost of the work. All construction was done by day labor and the results were good although it was difficult at times to get as many good workmen as was desired.

A piece of land was deeded to the city by the Jefferson Gilbert heirs and a piece bought of H. G. Gagne to allow the construction of a connecting sewer from Baldwin to Merrimac streets.

A street or right of way should be laid out from Union avenue to Dewey street for sewerage purposes and Cross street laid out as a public way with the grade established, to allow the construction of a sewer in that street as an outlet to New Salem street.

A street or way should be laid out through the land of Hazen P. Weeks, from Union avenue, to accommodate a sewer and take in the sewage on Olive Place which is thickly settled and is now without any means of drainage.

The owners of the sewer on Whipple avenue have been paid the amount of \$927.32, the cost of the sewer built by them, and it is now a public sewer.

PLUMBING.

The board of examiners of plumbers examined one applicant for a journeyman plumber's license and his work being found unsatisfactory he was not granted a license.

One hundred and eighty permits to do plumbing were taken out and the work when done was tested by this department as required by the laws of New Hampshire.

It can be readily seen that this department is obliged to give much time and attention to the testing of plumbing and the making and filing of records and it has been especially busy the past year as the work increased about 40%.

FIRE DEPARTMENT.

REPORT OF THE CITY ENGINEER.

LACONIA, N. H., Feb. 4th, 1911.

To the Honorable Mayor and City Council:

I herewith submit for your consideration, the eighteenth annual report of the fire department for the year ending Feb. 15, 1911.

During the year there have been eighty-four calls on telephones, and forty-two bell alarms. Insurance paid in the City of Laconia for fire losses during this period was \$22,988.52.

As chief engineer I would make the following recommendations: that the city purchase a steam fire engine, to be placed at the central fire station, transferring the engine now at the central station to the fire house at Lakeport. Also to purchase a combination chemical hose wagon for the Lakeport fire station. Owing to the large number of wooden buildings which are going up in Laconia with shingle roofs, and with many instances of faulty chimney construction, I would recommend that the city should appoint a building inspector. Owing to the somewhat cramped conditions at the central station would recommend that an addition be built at the rear of the station for stable purposes. This addition to be built to specifications of the city engineer. This would give needed room for our apparatus and better quarters for the horses. Hydrants should be located on Middle street, Lower Main street, Baldwin street extension and Gilford

avenue. I would further recommend that a small appropriation be made to overhaul the various reservoirs throughout the city which in case of a break of a water main would be of inestimable value to the city in case of fire. As the construction of these reservoirs has cost the City of Laconia \$3,566.03, it seems to me that the street department should be instructed that we cannot afford nor allow that these be filled up with grade, as for instance one reservoir in Lyford street has been covered with four feet of grade, also the reservoir at the foot of Pine street has been filled in with gravel. The water mains are liable at any time to break and in a dry time with a conflagration on hand we have absolutely no source of water but these reservoirs, which by their location about the city, thirteen in number represent to the city a strong ally in time of need. These reservoirs are located as follows: Depot square, which was tested by the steam fire engine Sept. 28th and showed on the water guage a capacity of 450 gallons a minute and lasted for fifty-eight minutes during which time considerable property might have been saved as any ordinary building would be burned down in an hour; Academy near Bowman; Court street corner Fair; Main street corner Pine; Lyford street; Main street opposite T. E. Prescott's; Mechanic near Rublee's shop; Belvidere near school; School street near Elm; Elm street north end; and the one in Lakeport square which is fenced in by the B. & M. R. R., which would cause delay in time of need. This particular reservoir cost \$1,253.53 and is very important to the safety of the property centering near Lakeport square, being connected with the lake and there being no possibility of its running dry. In this connection would recommend that arrangements be made with the B. & M. officials for some easier means of approach in case of there being need of running in the steamer to that reservoir. A fire alarm box should be located at the corner of Pine and Highland streets, in the Pine Hill district, and another at the extension of Baldwin street, which is

growing rapidly as a property part of the city. There being no easily accessible box for the residents at the head of Spring street, I would recommend that a box be located at that point, as now there is none nearer than Union avenue.

Gilford avenue having no box nearer than that located on the shop of the Mayo Machine Co., I would recommend that a box and a hydrant be centrally located on Gilford avenue.

From the good results that we have had from our still alarm system, I would suggest that the citizens would materially help out the fire department by telephoning the number of the house and location by street to the central station rather than by pulling in an alarm. This of course refers to small blazes first discovered, as we are amply able to care for such incipient blazes as might occur and be discovered before they have assumed the proportions of a dangerous fire.

I would recommend that a regular man be located at the central station to be called upon to go out with the chemical fire wagon, as at the present time we are obliged to call on the citizens to care for the horses while the driver goes to attend to the blaze. This man would also be called upon to look after the fire alarm system all over the city and would thus serve a double purpose.

In the thickly settled parts of the city the hydrants are so located that we have to use an enormous amount of hose when called upon to handle a fire of any consequence. I would recommend that it might be considerably more economical for the city to place a few more hydrants about the thickly settled parts of the city, and think that by so doing we could cut down the tremendous amount of hose that we are obliged to have to cope with the present conditions. This also represents a considerable saving in time, due to not having to lay out and couple up a lot of hose to get the amount of water needed. Then the hose which we are obliged to have will suffer deterioration by

laying on the rack. If we could by the means of a few more hydrants do away with so much hose we would at the same time save all this waste by spoiling. When we needed hose we should not have to get so much and would not have as much to be spoiling all the time. With the installation of more hydrants it seems as though the water company might be able to give us a better rate than at present. We are now paying \$25.00 a hydrant for one hundred and twelve hydrants, some of which have not been used for some time. If we could effect this better rate the installation of the hydrants would not be a very great burden, and I am confident that it would be well worth your consideration.

At this time please accept my sincere thanks for the assistance that you have at all times been so ready to extend. Without such coöperation it would be impossible to do what we are trying to do for the protection of the city. I hope that you will be as liberal as you have been in the past in making appropriation for the carrying on of this important department.

I also extend to the city marshal and those in his department our thanks for the assistance that they have at all times given us. Also to the citizens at large who have helped us either by assistance or by encouragement.

I also wish to extend my thanks for the assistance of the board of engineers and the men of the various companies who have been so loyal in their part.

In closing these recommendations would say that while there are a number of buildings that come under the city ordinances regarding having the entrances lighted at night there are yet several owners that have not complied with this requirement. I hope that in the near future that this matter will be attended to and the ordinance carried out.

Searches made for liquor, none found	6
Burglaries reported	8
Larcenies reported	6
Assisted out-of-town officers	3

I desire to call attention to the condition of the lock-up on the city property at Water street. This building has for years been inadequate and unsuitable for the purposes for which it was erected, and at the present time is very much in need of extensive repairs, in fact, so much so that the entire building would practically need to be re-built. Under these circumstances, your city marshal would recommend that the incoming city government give consideration to plans which have been made by the city engineer, for an extension of the central fire station and stable, to furnish accommodations for the fire department horses and also to include a modern lock-up with steel cells, a tramps' room, a cell on the second floor for female prisoners, and a small hall which can be utilized as a ward room for the voters of ward four.

These plans have been drawn with a view to furnishing much-needed accommodations for both the police and fire departments, and if adopted by the city government will solve the question of a proper place of detention, a matter which has been a problem ever since Laconia became a city.

Respectfully submitted,

CHARLES A. HARVELL,

City Marshal.

REPORT OF CLERK OF POLICE COURT.

To the City Council:

I have the honor to submit my report as clerk of the police court for year ending Feb. 15, 1911.

The number of criminal cases brought before this court and the disposal of the same the city marshal gives a detailed account.

Cash received for entry of civil cases, thirteen dollars and fifty cents, for which I hold receipt of city treasurer.

Respectfully submitted,

MARTIN B. PLUMMER,

Clerk of Police Court.

CITY SOLICITOR'S REPORT.

*To His Honor, the Mayor of the City of Laconia, and
members of the City Council:—*

I have the honor to submit my report as city solicitor. Since my report of last year the Lake Company tax cases have been satisfactorily disposed of, and these cases which have been so long on the docket are out of the way.

The equity case of Messrs. Tyler and Young relating to Whipple avenue has been dismissed, and the case on the sessions docket of the same plaintiffs against the city relating also to Whipple avenue has been disposed of by an order of judgment on the report of the county commissioners in favor of the city.

The suit of Nellie Ballam for personal injuries alleged to have happened on Church street bridge, has been tried by jury resulting in a verdict in favor of the plaintiff for fifteen hundred dollars. The verdict has been paid, one-half by the city and one-half by the street railway.

The petition of the Winnebepesaukee Camp Meeting Association for abatement of taxes has been dismissed.

The suit of Ezra Page to recover damages on account of alleged overflow and percolation of water has not yet been tried.

Since my last report a suit has been instituted by Mrs. Flossie B. Adams to recover damages for injuries alleged to have been sustained by falling on Elm street in Lakeport. This suit has not yet been tried. The two last mentioned cases being the only litigation on the docket of the court in which the city is at present interested as a party.

As usual numerous other matters have been attended to in this department.

Very respectfully submitted,

STEPHEN S. JEWETT,

City Solicitor.

OVERSEERS OF POOR.

*To Honorable Alfred C. Wyatt, Mayor, and Gentlemen of
the City Council of the City of Laconia, N. H.:*

We herewith submit our report as overseers of the poor for year ending February 15, 1911.

The number of persons receiving aid through this department at the present time is somewhat less than a year ago; the conditions, however, of those now being assisted, in way of shelter, food and raiment, remains practically unchanged.

With one or two exceptions, the cases being cared for by the city, are families consisting of widows and small children, and in the course of a few years should be self-supporting.

We are fortunate in that no serious sickness has prevailed among the families referred to through the year.

New cases are continually coming up, but with prompt attention and a thorough investigation, the number of cases helped has been kept to the minimum.

We wish to here call special attention to the excellent work carried on by the Laconia Benevolent association. The uplifting influence and moral tone, coupled with material benefits from those interested in this organization has been a valuable factor toward the success of this department, and we beg leave through these lines to express our personal and official appreciation of the efforts put forth; and extend herewith our hearty thanks.

Respectfully submitted,

FRED L. ROLLINS, for Wards 2, 3, 4 and 5.

OSCAR A. FLANDERS, for Wards 1 and 6.

BOARD OF HEALTH.

To the Honorable Mayor and City Council:

We herewith submit report of city board of health.

Year ending Dec. 31, 1910—Complaints made and investigated, 26; dead animals buried, 5; nuisances abated, 10; sewer connections ordered, 11; houses containing contagious diseases quarantined, 17; houses fumigated, 31.

Contagious diseases.—Diphtheria, 14, one fatal; measles, 9; typhoid fever, 5, one fatal; tuberculosis, 4 deaths; scarlet fever, 0.

The board of health is preparing and will soon submit for approval to the mayor and city council, rules and regulations governing the producing, care, and sale of milk. Nearly all the cities of New Hampshire have some local control, and we hope to improve the condition of our milk supply, in near future. Two or three general examinations of milk have been made during the year. While our milk supply is in quality fairly good, it has much too large a per cent of dirt.

The board will also ask the approval of the mayor and city council to compel every house owner on the city sewer line to connect both sinks and closets with the city sewer, giving owners one year's notice. The board recommend some provision for the sewage on Appleton street, Lakeport. This is a little settlement of twelve or fifteen houses without any kind of sanitary means of taking care of their drainage. The ground is springy and slopes toward the water, and is nearly directly across from our city water supply. We are sure this is a bad condition, and should be remedied this season.

Estimated expense for the year 1911, \$500.

Respectfully submitted,

J. A. WRISLEY, M. D., Pres.

FRED E. MOORE,

W. H. TRUE, M. D., Sec.

LACONIA HOSPITAL.

REPORT OF TREASURER.

To the Trustees of Laconia Hospital Association:

I herewith submit my report as treasurer for the year ending December 31, 1910.

	\$11,583.01

Respectfully submitted,

A. W. DINSMOOR,

Treasurer.

AUDITOR'S REPORT.

To the Honorable Mayor and City Council of Laconia:

I have attended to the duties of my office as auditor and have examined the accounts of the city treasurer, board of public works, tax collector, library, and city clerk, and find them correct and vouchers for the same.

In looking over the books for the past year it may not be entirely outside my province to suggest, that, in order to arrive at a true statement of the financial condition of the city, the following figures will need to be taken into account. In addition to the regular appropriations the following extra appropriations have been made during the current year:

Sewers	\$20,000.00
Whipple Ave. and suit dropped	1,230.00
Sheridan street	100.00
Belknap street widening, etc.	500.00
Pleasant street paving	3,500.00
Weirs schoolhouse repaired	1,000.00
Strafford street graded	400.00
Suit Nellie Ballan settled	750.00
Court expenses and bill in Lake Co. cases settled	762.60

Total \$28,242.60

(The above disposes of three suits against the city.)

Deducting from the above amount the net debt
increase as shown by the clerk's report . . 18,393.96

Leaving actual net gain for this year \$ 9,848.64
Provided only the regular appropriations
had been made.

I bring this matter to the attention of the council inasmuch as it is the usual custom for the voters to look at the net debt statement of increase or decrease, and in many instances to go no further to see where this originates. Taking these figures in connection with the report of last year this present administration should have credit from the voters of Laconia with having made a gain of over \$20,000 in the two years just passing.

Had there been no issue of sewer bonds there would have been still a small reduction in the debt, even with the extra appropriations of \$8,242.60.

I would like to suggest to your honorable body the discussion of the feasibility of closing your fiscal year on December thirty-first, thereby giving ample time to close the books and accounts, make the audit, and have the reports in the hands of the voters at least several days before the elections.

As the matter stands now, it is a case of "hustle" for all of the city officials to get ready for the annual printing. This necessitates the casting aside of the regular work, for the time being, and devoting every moment to preparing "copy".

This often requires working late at night, and often seems to require strenuous labor and hurried examinations of accounts in order to get ready for the council meeting, and later for the annual election.

I desire to express my appreciation for all courtesy shown me and the ready assistance on the part of all of your public officials.

Respectfully submitted,

ARTHUR T. CASS,

City Auditor.

February 27, 1911.
